

Prime 1364 kVA Diesel Generating Sets

Voltage	Prime*	
Voltage	kVA	kW
380-415	1364	1091

Standby*		Ampere
kVA	kVA kW	
1500	1200	1900

Prime Rating

Applicable for supplying continuous electrical power at variable load for unlimited hours. This model can supply 10% overload

power for a period of 1 hour in 12 hours operation as it is defined in ISO 3046.

Standby Rating

Applicable for supplying continuous power ar variable load in the event of a utility power failure and overload is not allowed as it is

defined in ISO 8528-3.

Standard Generator Features

- AMF, Automatic mains failure unit
- · Heavy duty type, 12 cylinder, water cooled engine
- ♦ 50°C tropical type radiator
- Starter motor
- Lead acid battery
- Charging alternator
- Battery charge redressor
- Heavy duty, brushless type alternator
- * Base frame with anti-vibration units
- ♦ Industrial type silencers
- ♦ Flexible exhaust compensator
- Block water heater unit
- ♦ Control panel with digital-automatic main control module
- Fan, fan drive, charging alternator drive and all rotating parts covered
- Radiator matrix covered by metal mesh against the mechanical damages
- Fabricated and welded steel base frame
- ♦ Anti-vibration mountings
- Engine and alternator manufacturer test reports
- Factory load, performance and function tests

Optional Features

- Automatic load transfer panel
- · Automatic syncronization and power sharing systems
- Soundproof canopy
- Container type enclosers
- Road trailer
- Job-site trailer
- Protection circuit breaker
- Air start
- Remote type radiator
- Base fuel tank
- ♦ External type fuel tank
- Automatic fuel transfer system
- Residential silencer

Prime 1364 kVA Diesel Generating Sets

Alternator Technical Data

Manufacturer	STAMFORD
Model	PI734B
Type	4-Poles, Rotating Field, Brushless
Standby power at rated voltage, kV	A 1500
Efficiency, %	94,7
Power factor	0.8
Phase	3
Frequency, Hz	50
Speed, Rpm	1500
Voltage, V	380/415
Excitation	Self excited
Stator windings	2/3 Pitch factor
Regulation	AVR, Auto Voltage Regulator
Voltage Regulator	MX341
Voltage Regulation, %	± 1
R.F.I Suppression	BS EN 61000-6-2,BS EN 61000-6-4
	VDE0875G, VDE 0875N
Waveform distortion	No Load <1.5% Non distorting balance
Rotor	Dynamic balanced
Overspeed, Rpm	2250
Short circuit current	< 300%
TIF	Less than 50
Insultion class	Н
Construction	Single bearing, direct coupled
Coupling	Flexible
Stator winding	Double layer concentric
Connection	WYE
Protection class	IP23
Cooling air volume,m3 / sec	2,69

Winding&Electrical Performance

All generator stators are wound to 2/3 pitch. This eliminates triplen harmonics on the voltage waveform and is found to be the optimum design for trouble-free supply of non-linear loads. The 2/3 pitch design avoid sexcessive neutral currents sometimes seen with higher winding pitches, when in parallel with the mains. A fully connected damper winding reduces oscillations during paralelling. This winding, with the 2/3 pitch and carefully selected pole and tooth designs, ensures very low waveform distortion.

Quaility Assurance

Generators are manufactured using production procedures having a quality assurance level to BS EN ISO 9001.

Optional Equipment

- ⋄ Optional Permanent Magnet Generator (PMG) provides an isolated power supply to the excitation control system
- * MX321 (PMG) with 3 Phase Sensing and improved Regulation 0.5%
- Ouadrature Droop kit for Parallel Operation
- * Winding Protection Thermistors
- ♦ Temperature Indicaiton RTD's
- Air filters
- Anti condensation heaters

Terminals&Terminal Box

Standard generators feature a main stator with 6 ends brought out to the terminals, which are mounted on the frame at the non-drive end of the generator. A sheet steel terminal box contains the AVR and need provides ample space for the customers wiring and gland arrangements. It has removable panels for easy access.

Shaft&Keys

All generator rotors are dynamically balanced to better than BS6861 :Part 1 Grade 2.5 for minimum vibration in operation. Two bearing generators are balanced with a half key.

Insulation / Impregnation

The insulation system is class 'H'

All wound components are impregnated with materials and processes designed specifically to provide the high build required for static windings and the high mechanical strength required for rotating components.

Standards

Newage Stamford industrial generators meet the requirements of **BS** EN 60034 and the relevent section of other international standards such as BS5000, VDE0530, NEMA MG1-32, IEC34, CSA C22.2-100, AS1359 Other standards and certifications can be considered on request

Deepsea 7320 Control System Description

- ◆ Deepsea 7320 is an Auto Mains(Utility) Failure Control module.
- The module is used to monitor a mains supply and automaticlly start a standby generator set.
- ♦ The module can also monitor an extensive number of engine parameters and it can display warnings, shutdown and engine status information on the back-lit LCD screen, illuminated LEDs, remote PC and via SMS text alerts.
- Selected timers and alarms can be altered by the user from the front panel.
- $\,^{\diamond}$ Alterations to the system are made using the 810 interface and a PC and it also provides real time diagnostic facilities

Specification DC SUPPLY

Continuous Voltage Rating: 8 V to 35 V

Maximum Operating Current: 340 mA at 12 V, 160 mA at 24 V Maximum Standby Current: 160 mA at 12 V, 80 mA at 24 V

Charge Fail/Excitation Range: 0 V to 35 V

MAINS(UTILITY) & GENERATOR

Voltage Range: 15 V - 333 V AC (L-N)
Frequency Range: 3,5 Hz to 75 Hz

OUTPUTS

Output A (Fuel): 15 A DC at supply voltage
Output B (Start): 15 A DC at supply voltage
Output C & D : 8 A 250 V (Volt free)

Input Functions display on LCD

Generator Volts	Volts L1-N, L2-N, L3-N	
Generator Volts	Volts L1-L2, L2-L3, L3-L1	
Generator Amps	Amps L1, L2, L3	
Generator Frequency	Hz	
Mains Volts	Volts L1-N, L2-N, L3-N

Generator total power	kW L1, L2, L3,total	
Generator power factor	Cosφ L1, L2, L3,total	

Features

4-Line back-lit LCD text display and five key menu navigation

LED and LCD alarm indication

9 configurable inputs and 8 configurable outputs

Configurable timers, alarms and event log (250)

Fuel usage monitor and low fuel alarms

Charge alternator failure alarm

Manual speed and manual fuel pump control

Engine exerciser and "Protections disabled" feature

kW overload protection

Power monitoring (kW, h, kV Ar, kv A h, kV Ar h)

Load switching (load shedding and dummy load outputs)

Automatic load transfer and unbalanced load protection

Independent Earth Fault trip

Support for up to three remote display units and USB connectivity

Configurable display languages

Remote SCADA monitoring

User selectable RS232 and RS485 communications SMS messaging (external modem required)

Additional display screens to help with modem diagnostics

Alarm Channels

Under/over generator voltage

Over-current

Under/over generator frequency

Under/over speed Charge fail Emergency stop

Low oil pressure

High engine temperature

Fail to start

Low/high DC battery voltage

Reverse power

Generator phase rotation error Generator short-circuit protection Loss of speed sensing signal

Mains out of limits

Optional Input Functions

Engine Oil pressure	kPa	
Fuel level	%	
Engine Temperature	°C
