Prime 1511 kVA **Diesel Generating Sets**

Voltago	Prime*		Standby*		Amnono
Voltage	kVA	kW	kVA	kW	Ampere
380-415	1511	1208	1660	1328	2105

Prime Rating Applicable for supplying continuous electrical power at variable load for unlimited hours. This model can supply 10% overload power for a period of 1 hour in 12 hours operation as it is defined in ISO 3046.

Applicable for supplying continuous power ar variable load in the event of a utility power failure and overload is not allowed as it is Standby Rating defined in ISO 8528-3.

Standard Generator Features

- * AMF, Automatic mains failure unit
- * Heavy duty type, 12 cylinder, water cooled engine
- ♦ 50°C tropical type radiator
- Starter motor
- Lead acid battery
- Charging alternator
- Battery charge redressor
- Heavy duty, brushless type alternator
- * Base frame with anti-vibration units
- * Industrial type silencers
- Flexible exhaust compensator
- * Block water heater unit
- * Control panel with digital-automatic main control module
- * Fan, fan drive, charging alternator drive and all rotating parts covered
- * Radiator matrix covered by metal mesh against the mechanical damages
- * Fabricated and welded steel base frame
- Anti-vibration mountings
- * Engine and alternator manufacturer test reports Factory load, performance and function tests

Truly Global, Fully Reliable

All information in this document is substantially correct at time of printing and may be altered subsequently

Optional Features

- Automatic load transfer panel · Automatic syncronization and power sharing systems
- Soundproof canopy
- * Container type enclosers
- * Road trailer
- Job-site trailer
- * Protection circuit breaker
- Air start
- · Remote type radiator
- Base fuel tank
- External type fuel tank Automatic fuel transfer system
- * Residential silencer

Prime 1511 kVA **Diesel Generating Sets**

Engine Technical Data

Manufacturer	PERKINS	
Model	4012-46TAG2A	
Туре	4 cycle, water-cooled	
Number of cylinders	12	
Cylinder arrangement	60° Vee	
Displacement, Liters	45,842	
Bore X Stroke, mm	160 X 190	
Compression Ratio	13,6:1	
Combustion System	Direct injection	
Aspiration	Turbocharge, air to air cooled	
Rotation	Anticlockwise viewed on flywheel	
Gross engine power, kWb	1459	
Fan Power, kWm	64	
BMEP gross, bar	25,38	
Combustion air flow, m3 / min	128	
Exhaust gas temp.(after turbo), °C	455	
Exhaust gas flow (after turbo),m ³ / n 320		
Mean piston speed, m / s	9,5	

Cooling System

Туре	Tropical, heavy duty type	
Ambient temperature, °C	50	
Engine coolant capacity, Liters	73	
Engine&Radiator coolant capacity	210	
Jacket coolant flow Liters/sec	17	
Cooling minimum airflow m3/min	1944	
♦Two twin thermostats		
 Powder coated radiator comprising: water radiator; fuel oil cooling 		
(opt); all pipes, hoses and clips; fan; pulleys; fan belts, safety guards		

Lubrication System

Туре	Pressurized
Lub oil capacity sump min, Liters	177
Lub oil pressure, kPa	400
 Wet sump with filler and disptick

Alternator Technical Data

Manufacturer	STAMFORD
Model	PI734C
Туре	4-Poles, Rotating Field, Brushless
Standby power at rated voltage, k	XVA 1660
Efficiency, %	95,1
Power factor	0.8
Phase	3
Frequency, Hz	50
Speed, Rpm	1500
Voltage, V	380/415
Excitation	Self excited
Stator windings	2/3 Pitch factor
Regulation	AVR, Auto Voltage Regulator
Voltage Regulator	MX341
Voltage Regulation, %	± 1
R.F.I Suppression	BS EN 61000-6-2,BS EN 61000-6-4
	VDE0875G, VDE 0875N
Waveform distortion	No Load <1.5% Non distorting balance
Rotor	Dynamic balanced
Overspeed, Rpm	2250
Short circuit current	< 300%
TIF	Less than 50
Insultion class	Н
Construction	Single bearing, direct coupled
Coupling	Flexible
Stator winding	Double layer concentric
Connection	WYE
Protection class	IP23
Cooling air volume,m3 / sec	2,69

Winding&Electrical Performance

All generator stators are wound to 2/3 pitch. This eliminates triplen harmonics on the voltage waveform and is found to be the optimum design for trouble-free supply of non-linear loads. The 2/3 pitch design avoid sexcessive neutral currents sometimes seen with higher winding pitches, when in parallel with the mains.A fully connected damper winding reduces oscillations during paralelling. This winding, with the 2/3 pitch and carefully selected pole and tooth designs, ensures very low waveform distortion.

Quaility Assurance

Generators are manufactured using production procedures having a quaility assurance level to BS EN ISO 9001.

Optional Equipment

- * Power Factor Controller
- *MX321 AVR with 0.5% Regulation and 3 phase sensing Quadrature Droop kit for Parallel Operation
- * Winding Protection Thermistors
- * Temperature Indicaiton RTD's
- Air filters
- Anti condensation heaters
- Diode Failure Unit
- Excitation Loss Module
- * Manuel Voltage Regulator and Re-greased bearings

Terminals&Terminal Box

Standard generators feature a main stator with 6 ends brought out to the terminals, which are mounted on the frame at the non-drive end of the generator. A sheet steel terminal box contains the AVR and ed provides ample space for the customers wiring and gland arrangements.It has removable panels for easy access.

Shaft&Keys

All generator rotors are dynamically balanced to better than BS6861 :Part 1 Grade 2.5 for minimum vibration in operation. Two bearing generators are balanced with a half key.

Insulation / Impregnation

The insulation system is class 'H'

All wound components are impregnated with materials and processes designed specifically to provide the high build required for static windings and the high mechanical strength required for rotating components.

Standards

Newage Stamford industrial generators meet the requirements of BS EN 60034 and the relevent section of other international standards such as BS5000, VDE0530, NEMA MG1-32, IEC34, CSA C22.2-100, AS1359 Other standards and certifications can be considered on request

Prime 1511 kVA Diesel Generating Sets

Deepsea 7320 Control System Description

• Deepsea 7320 is an Auto Mains(Utility) Failure Control module. • The module is used to monitor a mains supply and automaticlly

start a standby generator set.

The module can also monitor an extensive number of engine parameters and it can display warnings, shutdown and engine status information on the back-lit LCD screen, illuminated LEDs, remote PC and via SMS text alerts.

 Selected timers and alarms can be altered by the user from the front panel.

 Alterations to the system are made using the 810 interface and a PC and it also provides real time diagnostic facilities

Specification

DC SUPPLY

Continuous Voltage Rating:8 V to 35 VMaximum Operating Current:340 mA at 12 V, 160 mA at 24 VMaximum Standby Current:160 mA at 12 V, 80 mA at 24 VCharge Fail/Excitation Range:0 V to 35 V

MAINS(UTILITY) & GENERATOR Voltage Range: 15 V - 333 V AC (L-N)

Voltage Range: Frequency Range:

OUTPUTS

Output A (Fuel): Output B (Start): Output C & D : 15 A DC at supply voltage 15 A DC at supply voltage 8 A 250 V (Volt free)

Generator power factor	Cos

Features

4-Line back-lit LCD text display and five key menu navigation	
LED and LCD alarm indication	
9 configurable inputs and 8 configurable outputs	
Configurable timers, alarms and event log (250)	
Fuel usage monitor and low fuel alarms	
Charge alternator failure alarm	
Manual speed and manual fuel pump control	
Engine exerciser and "Protections disabled" feature	
kW overload protection	
Power monitoring (kW, h, kV Ar, kv A h, kV Ar h)	
Load switching (load shedding and dummy load outputs)	
Automatic load transfer and unbalanced load protection	
Independent Earth Fault trip	
Support for up to three remote display units and USB connectivity	
Configurable display languages	
Remote SCADA monitoring	
User selectable RS232 and RS485 communications	
SMS messaging (external modem required)	
Additional display screens to help with modem diagnostics	

Alarm Channels

Under/over generator voltage
Over-current
Under/over generator frequency
Under/over speed
Charge fail
Emergency stop
Low oil pressure
High engine temperature
Fail to start
Low/high DC battery voltage
Reverse power
Generator phase rotation error
Generator short-circuit protection
Loss of speed sensing signal
Mains out of limits

Optional Input Functions

Engine Oil pressure	kPa
Fuel level	%
Engine Temperature	°C
